

I am so excited to be teaching your child in PE this year! We've had a great first semester! I've been teaching in Wyoming Public Schools for 21 years; I taught middle school special education for about 15 years. The past 6 years I have been part time; I taught a couple years of Kindergarten and this is my 4th year teaching PE. I love my job!

I have been married for 13 years to my husband, Tim. We have 3 children. Luke is 11 and loves hockey, soccer, and baseball. My oldest daughter, Emme, is 9. She loves babies, playing school and her American girl doll. Abby is 4 and keeps us all entertained! We enjoy going to sporting events, the beach and spending time with our extended family.

My goal is to provide a safe, positive, and nurturing environment where all students strive to do their personal best. I will provide them with exciting activities that reach students at all skill levels. In PE they will learn a variety of skills that will last a lifetime, including fitness and sports related skills, social skills and healthy habits. I wanted to create this website/blog so that you have the opportunity to see what your child is doing while they are in my class. Please be patient with me as I learn this technology as I go. If you have any question please feel free to contact me. I work Monday-Wednesday.
